PRODUCT DESCRIPTION

Phosphorus is an element essential to sustaining life largely through phosphates. Phosphorus is a mineral found in many foods like beer, cheese, beans, and fish. It is also one of the most common substances in your everyday environment and in your body. It plays an important role in the health of your kidneys, bones, muscles, and blood vessels, as well as each cell in your body.

Phosphate is necessary for the formation of bone and teeth. Phosphate is also used as a building block for several important substances, including those used by the cell for energy, cell membranes, and DNA (deoxyribonucleic acid). The body obtains phosphate from foods and excretes it in urine and sometimes stool.
